## **Acknowledgment**

It gives me great pleasure to express my gratitude and heart-full thanks to all those who helped me in completing this project successfully. Big thanks to the respected head of the department **Dr.Neha Mahendra**, for her constant support and guidance throughout the project. Her dynamism, vision, sincerity, and motivation inspired us deeply. I would like to express my deep and sincere gratitude to my project guide, who always encouraged and helped me to make this project. I would also like to extend my heartfelt thanks to my family and friends for always being there as a firm pillar and also for being the best critic and support.

**Harsh Narain**

## **Preface**

The Tremor Detection Glove with Haptic Feedback Motors and Android Application is a revolutionary project aimed at aiding individuals with tremors or involuntary hand movements. By integrating sensors, haptic motors, and an Android application, this project detects and quantifies tremors in real-time. The glove's sensors capture hand movements, which are analysed using algorithms to identify tremor patterns. Haptic motors embedded in the glove provide gentle vibrations as feedback, enhancing the user's awareness and control. The accompanying Android application displays tremor activity, allows customization of sensitivity and feedback settings, and enables long-term tracking of progress. This innovative solution aims to empower individuals with tremors, improving their quality of life and independence.

## **Table of contents**

Frontpage	i
Certificate	ii
Acknowledgment	iii
Preface	iv

1. Introduction and features of technology.....	1-8
• Arduino	
• Android	
• Android Studio	
• Kotlin	
• Component used	
2. Introduction of project.....	9-11
• Objective	
• Introduction	
3. scope of project.....	12-13
4. Theoretical Background and definition of problem.....	14
• Theoretical Background	
• Problem Definition	
5. Feasibility study.....	15-16
6. System planning.....	17-18
7. Methodology adopted.....	19-20
8. System Implementation.....	21-22
• Project Category	
9. Hardware and software requirements.....	23
10. System Design.....	24-26
• Database table structure	
• ER Diagram	
• 0Level DFD	
• 1LevelDFD	
• 2Level DFD	
11. Snapshot from application.....	27-38

12.Component photos.....	39-40
13.Testing.....	41-43
14.Implementation.....	44
15.Limitations of the system.....	45
16.Future scope.....	46
17.References.....	47
